Food Panel Items Highlighted in RED are Sensitivities & Triggers

Proteins	Vegetables	Fruits	Grains	Additives	Misc. Items
Beef	Artichoke	Agrumi	Amaranth	Black Pepper	Bakers Yeast
Buffalo	Asparagus	Apple	Barley	Casein	Beer
Elk	Avocado ²	Apricot	Buckwheat	Ethoxyquin	Beet Pulp
Goat	Beet	Banana	Corn	Food Colorings	Brewers Yeast
Kangaroo	Bok Choy	Blackberry	Millet	Food Preservatives	Carob
Lamb	Broccoli	Blueberry	Oat	Gelatin	Cheese
Llama	Brussels Sprouts	Boysenberry	Quinoa	Aspartame	Chocolate
Pork/Ham	Cabbage	Cantalope	Rice/ White ²	Salt	Coffee
Rabbit	Carrot	Coconut ²	Rice/Brown ²	Distilled Vinegar	Cottage Cheese
Venison	Cauliflower	Cranberry	Rye	Yeast Culture	Garlic
Yak	Celery	Currant	Spelt		Gluten
		Date	Wheat		Honey
Poultry	Chile Pepper	Fig	Beans,Nuts,Seeds	Oils	
Chicken / Egg	Collard Greens	Grape	Almond ²	Canola	Malt
Duck / Egg	Cucumber	Grapefruit	Black Turtle Bean	Cotton Seed	Molasses
Emu	Dandi Greens	Honeydew	Black-eyed Pea	Fish ²	Nutritional Yeast
Goose	Eggplant	Kiwi	Brazil Nut	Krill	Parsley
Ostrich	Green Beans	Lemon	Cashew	Menhaden fish ²	Sugar
Quail/Pheasant	Green Pea/Split Pea	Lime	Chia Seed	Safflower	Tapioca
Turkey	Green Pepper	Mango	Dill Seed	Salmon ²	Tea
Fish	Jicama	Nectarine	Fava Bean	Vegetable	Tobacco
Cod ²	Kale/ Chard	Orange	Filbert		Vanilla
Fish Meal ²	Leek	Papaya	Flax seed / Oil	Spices	Whey
Haddock	Lettuce	Peach	Garbanzo/Chickpea	Allspice	Wine - Red
Herring/Anchov.	Mushroom	Pear	Great Northern Bean	Anise	Wine - White
Mackerel	Mustard Greens	Pineapple	Hazelnut	Cilantro	Yogurt
Menhaden fish ²	Napa Cabbage	Plum	Kidney Bean	Curry	
Pollock	Okra	Quince	Lentils	Fenugreek	
Salmon ²	Olive ²	Raspberry	Lima Bean	Hops	
Sardine	Onion	Rhubarb	Macadamia	Mint	
Shark	Parsnip	Strawberry	Navy Bean	Mustard	
Shellfish ⁴	Pimento	Watermelon	Peanut / Oil	Nutmeg	
Trout	Potato		Pecan	Paprika	
Tuna	Pumpkin / Seed		Pine Nut	Rosemary	
Milks	Radish		Pinto Bean	Sage	
Dairy Milk ⁵	Red Pepper		Pistachio	Spice Mix ³	
Goat Milk ⁵	Spinach		Sesame Seed / Oil	Thyme	
Sheep Milk ⁵	Sprouts		Soy - Lecithin ²		
	Squash (summer)		Sunflower Seed / Oil	Chondroitin	
	Squash (winter)		Walnut	Glucosamine	
	Swt potato/Yam				
	Tomato				
	Turnip				
	Zucchini				

Probable Concerns	
Boxes marked in orange indicate imbalances that may require further attention.	
Yeast	Pesticides
Candida	Chlorine
Herbicides	Parasites
Bacteria/Virus	Mold
Fungus	Vaccinosis
Immune System	Thyroid

*Some items on this panel can be toxic for pets. Even though they may not be shown as sensitivities or triggers, we encourage you to research toxic foods for pets before feeding raw , home-cooked, or other "people" food.

² Describes the food source including oils, waters, milks
³ Cinnamon, Coriander, Ginger, Nutmeg, Turmeric
⁴ Clam, Crab, Lobster, Mussels, Oysters, Shrimp
⁵ Pasteurized

Fennel	Wormwood	
Fever Few	Yucca	
Garlic	Turmeric	
Ginger		
Golden Seal		
Green tea ext.		
Kelp		

NOTE: We do not encourage the use of all beneficial remedies at one time.

Colloidal Silver is a natural antibiotic, antiviral and antifungal effective in removing impurities. **Daily Defense** helps keep parasites under control. It also contains natural vitamins, minerals, detox herbs and sea veggies for a great daily nutritional supplement.

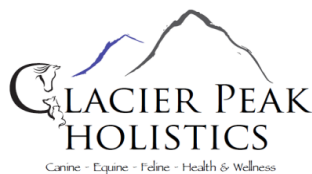

Glacier Peak Gold contains an ideal blend of herbs to address yeast/candida overgrowth. Your dog might have some discomfort or anxiety that can be safely and effectively addressed with **Herbal Aspirin**.

There may be some inflammation issues. Several of the herbs highlighted in green are in our **Inflapotion**.

Mountain Salve is a topical anti-biotic/anti-fungal and can help with hot spots and open skin issues and secondary infection.

Peak Immune helps rebuild a weak immune system to help protect your pet from imbalances. **Digest Basic** provides critical enzymes pets need to properly digest their food. This also helps with yeast overgrowth.

Pro-Bio is a probiotic that supports healthy intestinal microflora balance. It helps with yeast overgrowth.

General Information About Your Pet's Results

Sensitivities and triggers along with toxins can be considered very harmful to your pets. Toxins are thought to be responsible for pet illnesses, including cancer, diabetes, kidney failure, acute chemical exposure, and serious infection. By removing these items from your pet's living environment, you can significantly benefit his or her health.

A pet without food and environmental sensitivities may not have a reaction to a substance, while one that has food and/or environmental sensitivities will react by releasing chemicals which cause unnatural symptoms. In the case of food sensitivities in dogs and cats, it's usually seen in red, itchy rashes on the skin or chronic yeast/ear infections. Keep in mind that a sensitivity is not always, or even usually, an allergy. This means that there is not a true allergy present, but these foods act as triggers for intolerance-type reactions, commonly exacerbated by a compromised immune system.

Suggestions to help bring your pet back into balance:

If there is a yeast or candida imbalance in your pet -

Apple cider vinegar is great for addressing yeast/candida overgrowth. Start by adding just a few drops in the food to let your pet get accustomed to the smell. Work up to ½ teaspoon per 25 pounds. We think adding apple cider vinegar to the diet is a healthy choice all the time. It has many well-documented health benefits.

Glacier Peak Gold has also been shown to be very effective in eliminating yeast/candida overgrowth. We also recommend digestive enzymes and probiotics to help maintain proper balance. We have found that Digest Basic and Pro-bio by Enzymedica are ideal for pets.

Colloidal Silver is a great natural antibiotic that helps eliminate yeast/candida overgrowth externally.

For bacteria and fungus, we recommend adding 1-2 teaspoons of organic coconut oil to your pet's daily routine. This is an excellent natural antibacterial and antifungal with many health benefits.

*For a gentle natural detox - **Daily Defense.***

Dandelion and nettles are great detox herbs to help eliminate toxins, including those that feed yeast. Astragalus is a highly effective immune booster. Alfalfa is high in organic vitamins and trace minerals. Kelp and dulse are high in iodine to feed the thyroid. We include bee pollen and diatomaceous earth for parasite control. This is ideal for pets that show probable concerns for herbicides, pesticides, or chlorine.

If your pet has a sensitivity to Dandelion Root: we recommend the amino acid NAC (N-Acetyl-Cysteine) in lieu of Daily Defense for cellular detox. NAC can be found at health food stores.

If your pet's results show a probable concern for an immune system imbalance -

A series of **Peak Immune** can help to rebuild a weak immune system. This series consists of 10 days on/10 days off, up to three times if needed. For maintenance, we recommend you give Peak Immune for 10 consecutive days, four times per year at the change of seasons.
